## COMPLETE BUG & INSECT SPRAY IMIDACLOPRID

**WHAT IS IMIDACLOPRID** – A very safe to use low toxic insecticide that was first introduced to the United States in 1994. Previously patented by Bayer and used in Confidor. It has a broad-spectrum activity combined with a systemic distribution which effectively controls a wide range of insect pests such as thrips, aphids, mealy bugs etc. Effective on contact and as a systemic. Being systemic it is absorbed into the plants sap to give continuous protection against insect attack.

### Features

- Systemic action
- Broad spectrum
- Low mammalian toxicity
- Breaks down to inert by products
- Very low concentrations needed
- Water based formulation

### Benefits

- Environmentally friendly – SGA Approved
